Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 41 is rejected under 35 U.S.C. 102(b) as being anticipated by Medin (6,130,723).

Regarding claim 41, Medin discloses (Figs. 1 and 2) a graphics system, wherein a pixel data processing arrangement having a programmable selectable-weight blending filter characterized by a vertically disposed three-pixel filter support region (the three pixels 12, 14, and 16) wherein at least two color data samples (R, G, B) from three vertically disposed pixels are blended to form a single pixel color (Fig. 2, new pixel value 36). See column 1, line 64 to column 3, line 25.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2676

Claims 42-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deering et al (6,496,187) in view of Medin (6,130,723).

Regarding claim 42, Deering et al discloses (Figs. 3B and 12) a graphics system comprising:

a frame buffer (sample buffer 162) containing super-sampled pixel data for a plurality of pixels (column 13, lines 29-31; and column 14, lines 6-8);

a plurality of scan-line buffers (Fig. 12, CACHE 176 and sample-to-pixel calculation unit 170) connected to receive super-sampled pixel color data from the frame buffer (162) (column 22, lines 45-56).

Deering et al fails to disclose the vertical three-pixel filter.

However, Medin discloses (Figs. 1 and 2) a graphics system, wherein a pixel data processing arrangement having a programmable selectable-weight blending filter characterized by a vertically disposed three-pixel filter support region (the three pixels 12, 14, and 16) wherein at least two color data samples (R, G, B) from three vertically disposed pixels are blended to form a single pixel color (Fig. 2, new pixel value 36). See column 1, line 64 to column 3, line 25.

It would have been obvious to a person of ordinary skill in the art at the time of invention to use the vertical three-pixel filter of Medin in the graphics system of Deering et al to provide a flicker filter, which is particularly useful for textual content which is generally not flicker prone yet requires high vertical resolution for comfortable reading.

Regarding claim 43, Deering et al further disclose the depth (Z data) information. Column 14, lines 43-45.

Allowable Subject Matter

Claims 38-39, 44-45, and 47 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 41-43 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
